AFP
BUDAPEST: Hacktivity 2010, the largest computer hackers' conference in eastern Europe, kicked off Saturday, with some 1,000 participants expected to attend the two-day event, according to organisers.
The conference was to bring together officials and computer experts from Hungary and abroad in an informal setting, combining lectures and discussions on serious issues such as Internet security, with lighter fare and games.
Bruce Scheier, a world-renowned cyber security expert, opened the congress with a keynote speech.
Other well-known participants and lecturers included
