Мы решили возобновить продажи после долгого перерыва в связи с выходом новой версии бота с буткитом. По сравнению с предыдущей версией улучшились стабильность, живучесть и функциональность. Так же хочу отметить появление возможности аренды софта.

Все наши текущие клиенты, по каким-либо причинам потерявшие с нами связь, могут получить обновление. В качестве обновления будет предоставлена одна из вариаций минимальной сборки, в зависимости от ранее. Новым клиентам такие вариации предоставляться не будут, для них существует только одна минимальная.

Мы открыты для разного рода предложений, в т.ч. по написанию АЗ и работе под %.

Предложения с условиями, при которых вы получаете текущий софт бесплатно, рассматриваться не будут.

Все вопросы и предложения просьба отправлять в jabber.

Все что оставляете в текущей теме, отправляете в РМ или куда-то еще может остаться без внимания.

При накоплении достаточного количества вопросов я организую FAQ.

Краткое описание:

Каждая последующая сборка включает в себя предыдущие

Минимальная:

- Лоадер

WE PETITION THE OBAMA ADMINISTRATION TO:

Make, distributed denial-of-service (DDoS), a legal form of protesting.

With the advance in internet technology, comes new grounds for protesting. Distributed denial-of-service (DDoS), is not any form of hacking in any way. It is the equivalent of repeatedly hitting the refresh button on a webpage. It is, in that way, no different than any "occupy" protest. Instead of a group of people standing outside a building to occupy the area, they are having their computer occupy a website to slow (or deny) service of that particular website for a short time.

As part of this petition, those who have been jailed for DDoS should be immediately released and have anything regarding a DDoS, that is on their "records", cleared.

The screenshot shows the front page of The New York Times website, specifically the Technology section. The top navigation bar includes links for HOME PAGE, TODAY'S PAPER, VIDEO, and MOST POPULAR. The main header features the newspaper's name, "Business Day", and the section title "Technology". A search bar is located in the top right corner. Below the header is a horizontal menu with various news categories: WORLD, U.S., N.Y. / REGION, BUSINESS, TECHNOLOGY (which is highlighted), SCIENCE, HEALTH, SPORTS, OPINION, ARTS, STYLE, and TRAVEL. The main article headline is "Bank Hacking Was the Work of Iranians, Officials Say", written by Nicole Perlroth and Quentin Hardy, published on January 8, 2013. The article text begins with "SAN FRANCISCO — The attackers hit one American bank after the next. As in so many previous attacks, dozens of online banking sites slowed, hiccupped or ground to a halt before recovering several minutes later." Below the text is a small image of a server room with a link to "Enlarge This Image". To the right of the image, the text continues: "But there was something disturbingly different about the wave of online attacks on American banks in recent". On the right side of the page, there are two sidebar sections: "Today's Headlines" with a sign-up for a round morning email, and "Subscribe to Technology News" with links to Internet, Start-Ups, Business, and Companies Computing.

[CHEAP] 's Professional DDOS Service [8\$/hour]

About:
We are here to provide you a Professional DDOS service.
We are capable of taking down small personal website/server to huge protected website/server for days

FAQ:

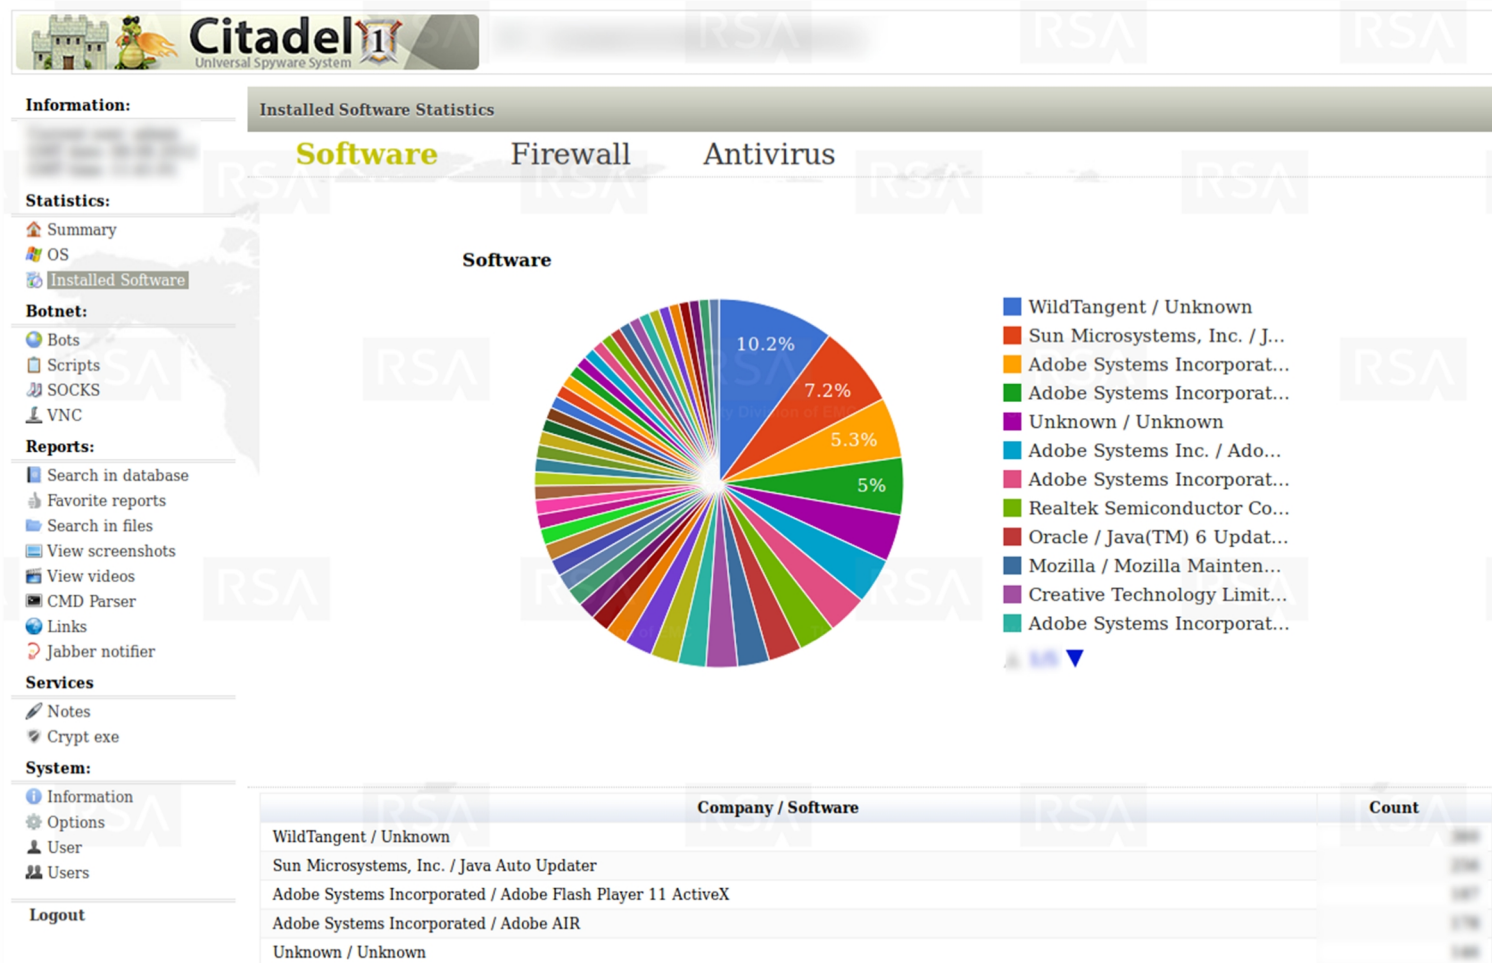

Question:
What is DDOS?

Answer:
A denial-of-service attack (DoS attack) or distributed denial-of-service attack (DDoS attack) is an attempt to make a computer or network resource unavailable to its intended users. Although the means to carry out, motives for, and targets of a DoS attack may vary, it generally consists of overwhelming the target with traffic or data, rendering the site or service from functioning efficiently or at all, temporarily or indefinitely.
